Student dashboard UI

Every notification should be show on dashboard

Teacher Dashboard UI

Functionality:- (LMS)

Flow should be like

Teacher -> Admin -> Student (Admin dashboard for approval purpose) Security is main concern

1) Home Work Flow(Teacher to admin -> admin to student **in return** student to admin -> admin to teacher) (Admin Dashboard Approval)

2) Report Card Flow(Teacher to admin -> admin to student **in return** student to admin -> admin to teacher) (Admin Dashboard Approval) and pre formatted form type

3) Live classes flow :- Automatic Live recording on cloud , Teacher can't pause/ resume the recording

4) Assignment Flow:- (Teacher to admin -> admin to student **in return** student to admin -> admin to teacher) (Admin Dashboard Approval)

5) Attendance Functionality:- Should be attached with billing:-

Class -> Attendance -> Billing

6) After Billing an invoice should be generate .

Payment through teacher dashboard , send mail or notification to student or parent

7) Billing will be that, how many sessions have been attended by both teacher and students

Billing for teacher :- Number of sessions and monthly basis pr

Billing for kids :- Monthly , weekly, yearly, half yearly , weekly, quarterly

8) Student name , subject , Class schedule time table, Phone number, email (visible for admin only) (teacher can see only kid's name)

9) kids can download recording from dashboard or can see recording . Previous history of classes, sessions, test

10) Live classes will be according to the time only, after the end of the time vision, live classes will not be visible but yes history will be visible .

11) For classes three sections will be there :-Assigned classes, Class attended /not attended , remark .

12) admin can assign roles and responsibilities to teacher , student , parent that what they can see on dashboard or not.
